Buckman Direct Diversion Project

A joint regional project of the City of Santa Fe and Santa Fe County to build a reliable and sustainable water supply.

Date: **December 19, 2012**

To: **Buckman Direct Diversion Board**

From: **Gary C. Durrant, Chief Operator BDD** GCD

Re: **Update on BDD Operations for the month of December 2012**

---

1. This memo is intended to update the BDD Board on BDD operations during the month of December.
   During December BDD diversions and deliveries have averaged, in Million Gallons Daily (MGD) as follows:

   a) Raw water diversions: 5.41 MGD
   b) Finished Drinking water deliveries through Booster Station 4A: 3.90 MGD
   c) Finished Drinking water deliveries through Booster Station 5A: 1.42 MGD
   d) Raw water delivery to Las Campanas at BS2A: 0.0 MG total. Note: Las Campanas has shut down water diversions for the remainder of 2012.

2. The BDD continues to provide most of the current water supply to the City and County. The current use for the City and County is 5.56 MGD and the BDD is providing 5.29 MGD. This is because the Canyon Road Water Treatment Plant is shut down for some repair. At the request of the City we are projected to continue to supply in this manner through January 2013.

3. The BDD has diverted 5865.42 acre feet of water through the end of November with a projection to divert an additional 452 acre feet in December for a total of 6317 acre feet for the year. Note: in the Water Resources Agreement the BDD is described as having a diversion capacity of 8730 acre feet annually.
