Buckman Direct Diversion Board
Michael Dozier, Interim Operations Superintendent $M>$
Update on BDD Operations for the Month of June 2015

## ITEM:

1. This memorandum is to update the Buckman Direct Diversion (BDD) Board on BDD operations during the month of July 2015. The BDD diversions and deliveries have averaged, in Million Gallons Daily (MGD) as follows:
a. Raw water diversions: 4.19 MGD Average
b. Finished Drinking water deliveries through Booster Station 4A: 1.95 MGD Average
c. Finished Drinking water deliveries through Booster Station 5A: 1.43 MGD Average
d. Raw water delivery to Las Campanas at BS2A: 10.56 MG Total.
2. The BDD is providing approximately 40 percent of the water supply to the City and County for the month. During this monsoon season BDD has made every effort to divert water on a regular basis. As we divert through this season the river will have high turbidities and LANL events that stop diversion. If diversion is not possible for a length of time that exhausts all storage for production BDD partners (City of Santa Fe, County of Santa Fe , and Las Campanas) will be notified.
3. Please see the following pages from the Monthly report to the Office of the State Engineer (OSE) for accurate information up to July 20, 2015.
4. Please note all prior years are also included for reference.
